

## European Technical Assessment

ETA 18/1017  
of 19.12.2018

### General part

|  |  |
|--|--|
| <b>Trade name of the construction product</b>  | TECBOR®  |
| <b>Product family to which the construction product belongs</b>  | Fire protective boards.  |
| <b>Manufacturer</b>  | <b>TECRESA Protección Pasiva SL</b><br>Parque Leganés Tecnológico<br>Margarita Salas 6<br>ES-28919 Leganés (Madrid)<br>Spain   |
| <b>Manufacturing plant(s)</b>  | According to Annex N kept by ITeC.   |
| <b>This European Technical Assessment contains</b>   | 18 pages including 1 annex which forms an integral part of this assessment<br>and<br>Annex N, which contains confidential information and is not included in the European Technical Assessment when that assessment is publicly available. |
| <b>This European Technical Assessment is issued in accordance with Regulation (EU) 305/2011, on the basis of</b> | European Assessment Document 350142-00-1106.   |

**General comments**

Translations of this European Technical Assessment in other languages shall fully correspond to the original issued document.

Communication of this European Technical Assessment, including transmission by electronic means, shall be in full (excepted the confidential Annex(es)).

## Specific parts of the European Technical Assessment

### 1 Technical description of the product

TECBOR® is a fire protective board of magnesium oxide, silicates and other components. The board is off-white with smooth faces, manufactured by TECRESA Protección Pasiva SL. The dimensions and density of the boards are given in table 1.

**Table 1:** Dimensions and density of TECBOR® boards.

|                              | Nominal value     | Tolerance |
|------------------------------|-------------------|-----------|
| Density (kg/m <sup>3</sup> ) | (dry at 40 °C)    | ± 90,0    |
|                              | (23 °C, 50 % RH)  | ± 92,5    |
| Length (mm)                  | 2300              | ± 5       |
| Width (mm)                   | 1220              | ± 3       |
| Thickness (mm)               | 5, 10, 15, 20, 30 | +2/-1     |

Assembled systems require additional products as described in Annex 1 of this ETA. These products are not covered by this ETA and cannot be CE marked on the basis of this ETA.

### 2 Specification of the intended use(s) in accordance with the applicable EAD

TECBOR® is intended for the fire protection of the constructive elements as specified in table 2, which also shows the related environmental use conditions.

**Table 2:** Intended use categories related to the protected element and the environmental conditions.

| Fire protection use          |                                  |                              |
|------------------------------|----------------------------------|------------------------------|
| EAD 350142-00-1106 reference | Element intended to be protected | EAD 350142-00-1106 reference |
| Type 4                       | Load-bearing steel elements      | Type Z <sub>2</sub>          |

This ETA covers assemblies installed in accordance with the provisions given in Annex 1.

The environmental use conditions assessed correspond to the following use category according to section 1.2.3 of EAD 350142-00-1106:

- Type Z<sub>2</sub>: Internal conditions excluding temperatures below 0°C, with humidity below 85% RH.

The provisions made in this ETA are based on a working life of the TECBOR® of at least 25 years, provided that the conditions laid down in the manufacturer's instructions for the installation, use and maintenance are met. These provisions are based upon the current state of the art and the available knowledge and experience.

The indications given on the working life of the construction product cannot be interpreted as a guarantee, but are to be regarded only as a means for choosing the appropriate product(s) in relation to the expected economically reasonable working life of the works.

### 3 Performance of the product and reference to the methods used for its assessment

#### 3.1 Performance of the product

The assessment of TECBOR® has been performed in accordance with EAD 350142-00-1106 *Fire protective board, slab and mat products and kits (September 2017)*.

**Table 3:** Performance of the product.

| Product: TECBOR®                | Intended use: Fire protective board |                     |
|---------------------------------|-------------------------------------|---------------------|
| Basic requirement               | Essential characteristic            | Performance         |
| BWR 2<br>Safety in case of fire | Reaction to fire                    | A1                  |
|                                 | Resistance to fire                  | See Annex 1         |
|                                 | Durability                          | Type Z <sub>2</sub> |

The rest of characteristics included in EAD 350142-00-1106 have not been assessed in this ETA.

#### 3.2 Methods used for the assessment

##### 3.2.1 Reaction to fire

The performance of TECBOR® has been tested according to EN ISO 1182<sup>1</sup> and EN ISO 1716<sup>2</sup>. Classification is given in accordance with EN 13501-1<sup>3</sup> and Regulation (EU) 2016/364.

##### 3.2.2 Resistance to fire

Fire resistance performance, classified in accordance with EN 13501-2<sup>4</sup>, has been determined following the test and evaluation methods given in Annex 1.

##### 3.2.3 Durability

The durability of TECBOR® has been assessed for Type Z<sub>2</sub> conditions in accordance with section 2.2.2.3 of EAD 350142-00-1106.

<sup>1</sup> EN ISO 1182 Reaction to fire tests for products. Non-combustibility test.

<sup>2</sup> EN ISO 1716 Reaction to fire tests for products. Determination of the gross heat of combustion (calorific value).

<sup>3</sup> EN 13501-1 Fire classification of construction products and building elements. Part 1: Classification using data from reaction to fire tests.

<sup>4</sup> EN 13501-2 Fire classification of construction products and building elements. Part 2: Classification using data from fire resistance tests, excluding ventilation services implemented.

#### **4 Assessment and verification of constancy of performance (AVCP) system applied, with reference to its legal base**

According to the Decision 1999/454/EC of the European Commission, the system of AVCP (see EC delegated Regulation (EU) No 568/2014 amending Annex V to Regulation (EU) 305/2011) given in the following table applies.

**Table 4:** AVCP System.

| <b>Product(s)</b>        | <b>Intended use(s)</b>   | <b>Level(s) or class(es)</b> | <b>System(s)</b> |
|--------------------------|--|------------------------------|------------------|
| Fire protective products | For fire compartmentation and/or fire protection or fire performance | Any                          | 1                |

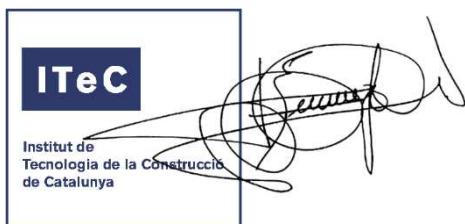

#### **5 Technical details necessary for the implementation of the AVCP system, as foreseen in the applicable EAD**

All the necessary technical details for the implementation of the AVCP system are laid down in the Control Plan deposited with the ITeC and agreed in accordance with EAD 350142-00-1106, section 3.

The Control Plan is a confidential part of the ETA and only handed over to the notified product certification body involved in the assessment and verification of constancy of performance.

The factory production control operated by the manufacturer shall be in accordance with the above-mentioned Control Plan.

Issued in Barcelona on 19 December 2018  
by the Catalonia Institute of Construction Technology.

Ferran Bermejo Nualart  
Technical Director, ITeC

## **ANNEX 1. Specification and assessment of the fire protection of load-bearing steel elements protected with TECBOR® boards (intended use Type 4)**

### **A.1.1 Classification**

The system described in this annex has been tested and evaluated according to EN 13381-4<sup>5</sup> and classified in accordance with EN 13501-2.

The assessment of the required thickness of TECBOR® boards multilayer system for the relevant resistance to fire period, at the design temperature within the range of 300 °C to 700 °C and in function of the section factor of the steel element, is given in section A.1.3.

### **A.1.2 Installation requirements**

The system installation should be carried out in accordance with the manufacturer's instructions and the provisions given in this ETA.

#### **A.1.2.1 Structural steel elements**

The supporting structure consists of load-bearing steel elements with the following characteristics:

- 'H' or 'I' shaped beam and column sections.
- Structural steel grades (S designation) in accordance with EN 10025<sup>6</sup>, excluding S185.
- Section factors as given in table A.1.2 to table A.1.10.

Steel elements with section factor lower than  $41 \text{ m}^{-1}$  shall be protected with the thickness of TECBOR® boards multilayer system given for an element with section factor equal to  $41 \text{ m}^{-1}$ .

- Three-sided fire exposure for beams and four-sided fire exposure for columns.

In case of beams or columns with fewer sides exposed to fire, thickness of the boards multilayer system can be applied according to table A.1.2 to table A.1.10 under consideration of the section factor calculated for the relevant case.

- Beams depth equal or lower than 750 mm and columns depth equal or lower than 600 mm.

#### **A.1.2.2 Fire protective boards**

TECBOR® boards shall be as described in section 1 of this ETA. Any part of the structural element exposed to fire shall be box-type cladded by a multilayer system of TECBOR® boards at the overall minimum required thickness as given in table A.1.2 to table A.1.10.

Boards are cut to size preferably with a saw or a knife and fixed in a multilayer system (see table A.1.1) to form an encasement around the steel element.

---

<sup>5</sup> EN 13381-4 Test methods for determining the contribution to the fire resistance of structural members. Part 4: Applied passive protection to steel members.

<sup>6</sup> EN 10025-1 to 6 Hot rolled products of structural steels.

### A.1.2.3 Joints

Fire protective boards shall be butt jointed. All joints between TECBOR® boards are completely filled with paste TECBOR®, as well as joints between boards and any adjacent constructive element.

Transversal joints between boards along the structural element are at 2300 mm distance in the same layer and staggered a minimum of 250 mm between different board layers.

### A.1.2.4 Installation methodology

TECBOR® Clips are attached to the structural element flanges every 500 mm (see figure A.1.1) and are made of galvanised steel type CX51D +Z140. TECBOR® Clip thickness is 1 mm and other dimensions depend on the structural element flange size as specified by the manufacturer. TECBOR® Clips are supplied by TECRESA under his responsibility.

Figure A.1.1: TECBOR® Clips.

Galvanised steel CX51D +Z140 C-profiles according to EN 14195<sup>7</sup> are fixed to the TECBOR® Clips at the structural element flanges (see figure A.1.2 and A.1.3).

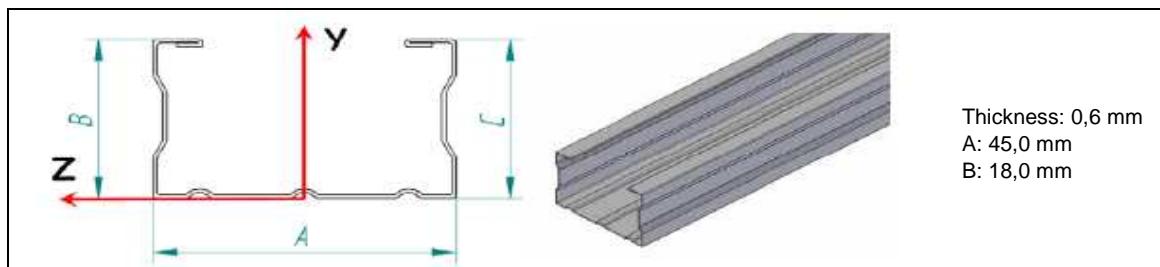

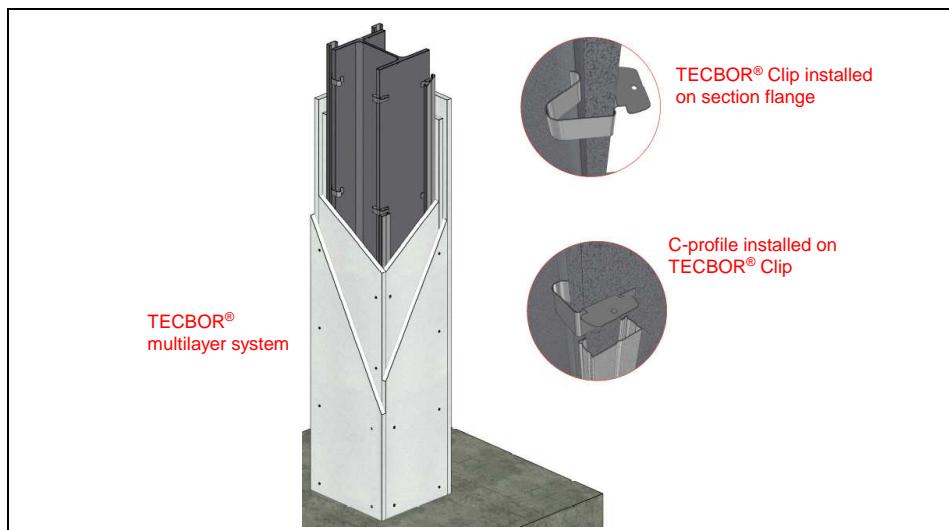

Figure A.1.2: C-profiles for TECBOR® boards installation.

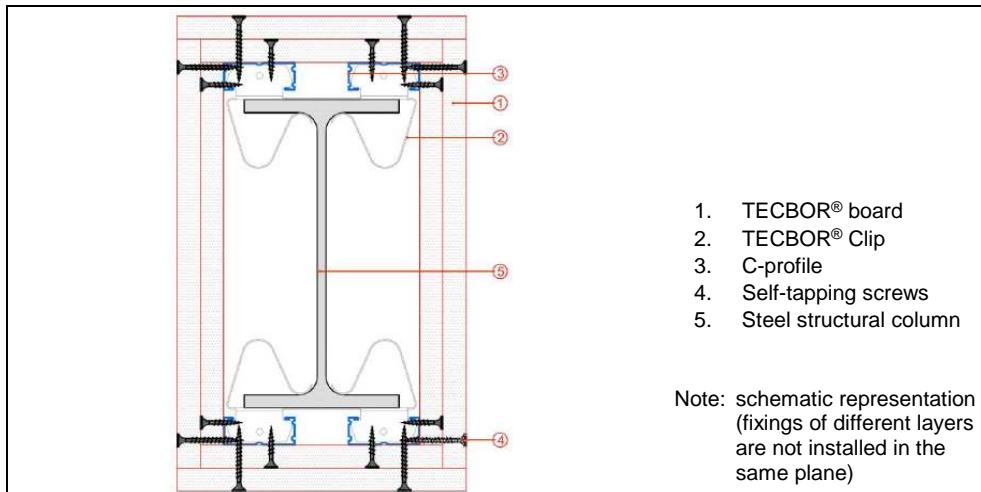

In the case of beams, at the upper flange ends of the structural element, galvanised steel L-profiles of dimensions 30 mm x 30 mm x 0,6 mm are fixed with nails intended for use in steel every 500 mm, instead of the TECBOR® Clips and C-profiles (see figure A.1.5).

TECBOR® boards are fixed to the C-profiles (or L-profiles at upper flange of beams) with self-tapping steel screws every 300 mm along the structural element (see figure A.1.4 and A.1.5). Screw dimensions are given in table A.1.1 in function of the number of layers and board thickness to be installed.

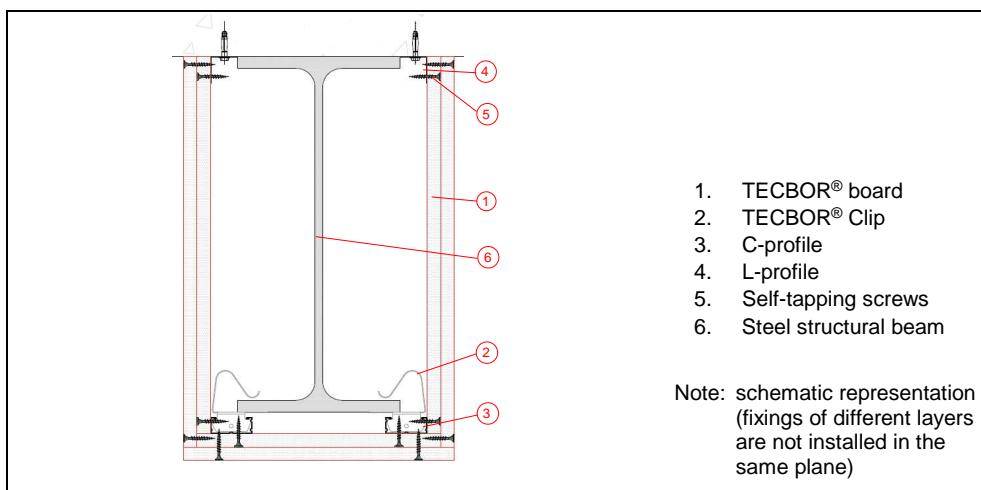

<sup>7</sup> EN 14195 Metal framing components for gypsum board systems. Definitions, requirements and test methods.

**Figure A.1.3:** Installation TECBOR® Clips, C-profiles and TECBOR® boards.

**Figure A.1.4:** Example of fire protective system installation (column section).

**Figure A.1.5:** Example of fire protective system installation (beam section).

**Table A.1.1:** Multilayer fire protection systems.

| <b>Overall boards thickness (mm)</b> | <b>Thickness of TECBOR® layers <sup>(1)</sup> (mm)</b> | <b>Screws for inner layer (dimensions in mm)</b> | <b>Screws for intermediate layer (dimensions in mm)</b> | <b>Screws for outer layer (dimensions in mm)</b> |
|--------------------------------------|--|--|---|--|
| 10                                   | 5 + 5  | Ø3,5 x 25  | -   | Ø3,5 x 25  |
